## In the Claims

Please cancel claims 11-47 without prejudice.

The following listing of claims replaces all prior listing of claims.

Please amend claim 1 as follows:

1. (Currently Amended) A method of deconjugating <u>in proximity to a metal ion</u> a modifier protein from a target protein, wherein the modifier protein is conjugated to the target protein via a peptide bond between the carboxy terminus of the modifier protein and a free amino group of the target protein, the method comprising contacting the <u>target protein to peptide bond with</u> a polypeptide comprising a <u>metalloprotease</u> characterized as <u>a JAB subunit</u>, thereby deconjugating the modifier protein from the target protein.

**PATENT** 

Attorney Docket No.: CIT1510-3

- 2. (Original) The method of claim 1, wherein the target protein is a cullin protein.
- 3. (Original) The method of claim 2, wherein the target protein is Cul1, Cul2, Cul3, Cul4A, Cul4B, or Cul5.
- 4. (Original) The method of claim 1, wherein the target protein has ubiquitin ligase activity.
- 5. (Original) The method of claim 1, wherein the target protein is part of a protein complex having ubiquitin ligase activity.
- 6. (Original) The method of claim 1, wherein the modifier protein is NEDD8, UBL1, SMT3H2, SMT3H1, APG12, FAT10, Fau, UCRP, URM1, or UBL5.
- 7. (Original) The method of claim 1, wherein the polypeptide is a polypeptide complex of COP9/signalsome.

PATENT Attorney Docket No.: CIT1510-3

- 8. (Original) The method of claim 1, wherein the polypeptide is AMSH, AMSH1, or AMSH2.
- 9. (Original) The method of claim 1, wherein the target protein is exposed to the polypeptide *in vitro*.
- 10. (Original) The method of claim 1, wherein the target protein is exposed to the polypeptide *in vivo*.

Claims 11-47 (Cancelled)
